## Glossary Contact Form

Form A	NO = Normally Open Contacts SPST = Single Pole Single Throw	
Form B	NC = Normally Closed Contacts SPST = Single Pole Single Throw	
Form C	Changeover SPDT = Single Pole Double Throw	
Form E	Bistable Contact Latching Type remains unchanged until a magnetic field of opposite polarity is present	

## Handling & Assembly Instructions

- Use proper lead clamping or heat sinking techniques to prevent mechanical and/or heat stress during, soldering, and welding
- Mechanical shock as the result of dropping the reed sensor typically from a distance of greater than 12" may change its magnetic sensitivity and/or destroy the sensor
- Any form of modification to the switch leads will alter its magnetic sensitivity

## Life Test Data

\*Load increase reduces life expectancy of Reed Switches
